UZAIR MUAZ

Senior Software Engineer | Team Lead

Islamabad, Pakistan | uzair.muaz3k@gmail.com | +923102222330 | linkedin.com/in/uzairmuaz | github.com/uzairmuaz

PROFESSIONAL SUMMARY

Senior Software Engineer and Team Lead with 4+ years of experience delivering scalable software products across travel technology, enterprise SaaS, Web3, AI, and robotics. Proven track record of modernizing legacy platforms, architecting distributed systems, leading engineering teams, and building applications serving 100K+ daily users. Experienced in translating business objectives into scalable technical solutions while driving platform performance, engineering quality, and long-term maintainability. Passionate about mentoring developers, improving engineering processes, and delivering products that create measurable business value.

CORE COMPETENCIES

Languages	JavaScript, TypeScript
Frontend	React.js, Next.js, Material UI, Ant Design, Shadcn, Tailwind CSS, Framer Motion
Backend	Node.js, NestJS, Microservices, REST APIs, WebSockets, Event-Driven Architecture
Databases	PostgreSQL, MongoDB, MySQL, Redis
Cloud & DevOps	AWS, Docker, CI/CD, Git, GitHub Actions
Other	RAG / LLM Integration, Blockchain Wallet Auth, RBAC, API Gateway, System Design

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Team Lead

Arcana Info • *Islamabad, Pakistan* *Dec 2024 – Present*

- Lead a team of **5 engineers**, overseeing sprint planning, technical interviews, effort estimation, architecture reviews, code reviews, and concurrent project delivery.
- Modernized a legacy WordPress platform into a scalable enterprise application now serving **100K+ daily users** with traffic peaks exceeding **300K** — with **zero business disruption** during a 4-month migration.
- Redesigned the booking experience for premium travelers, **simplifying complex user journeys** by reducing the booking flow from **3 steps to 1** and increasing **booking completion**, **customer retention**, and **engagement**.
- Built a **highly configurable travel operations platform** enabling business teams to independently manage travel packages, suppliers, promotions, newsletters, branding, and dynamic content — **reducing engineering dependency** and **operational turnaround time.**
- Improved platform performance through **API optimization, database tuning**, **caching strategies**, and **pagination**, significantly reducing average response times.
- Designed and implemented an **AI-powered chat assistant** on AWS, enabling contextual travel recommendations while deflecting 40% of repetitive customer inquiries.
- Architected a **microservices**-based freelancer marketplace comprising **10 independent services**, including API Gateway, authentication, RBAC, real-time messaging, payment processing, and secure file management.

Senior Frontend Engineer (Part-Time)

Freelance — International Clients • *Remote* *July 2024 – Dec 2025*

- Architected the frontend for a privacy-focused **Web3 AI platform**, implementing **blockchain wallet authentication** and **token-gated access control**, supporting a decentralized user identity model.
- Developed **secure Web3 onboarding** and **verification workflows**, improving user experience while maintaining robust authentication standards.
- Engineered a **robotics simulation and training platform**, enabling developers to execute, test, and validate robotic code in virtual and live environments.

Frontend Engineer

JMM Technologies — Saudi Arabia • *Remote* *Jan 2023 – Dec 2024*

- Contributed to a **multi-tenant enterprise HRMS**, leveraging **GraphQL** to support organizations across multiple locations with dedicated subdomains, configurable workflows, multilingual support, and dynamic branding — **serving 3 enterprise clients at launch.**
- Engineered **configurable business workflows** that streamlined organizational operations while supporting diverse client requirements from a single enterprise platform.
- Developed an AI-powered document proofreading platform leveraging LLMs to generate contextual writing suggestions with **inline highlights**, while enabling **collaborative editing** through role-based access control and **document-level commenting.**

Software Engineer

Devgate Consultancy • *Islamabad, Pakistan* *Jan 2022 – Dec 2022*

- Built a **SaaS co-working space management platform** from scratch, delivering an enterprise-grade frontend with complex scheduling, booking management, and role-based access control.
- Improved response time through code splitting, lazy loading, caching strategies and API optimizations.
- Developed a delivery dispatch and logistics platform integrating **Shopify** with multiple shipping providers, automating order fulfillment, shipment routing, and end-to-end tracking for **5,000+ monthly orders**.
- Mentored **3 engineering interns** through a structured **12-week curriculum** covering JavaScript, React, software architecture, and engineering best practices — **2 of whom were offered full-time roles.**

AWARDS & ACHIEVEMENTS

Employee of the Month — JMM Technologies (2024)

Recognized for consistently delivering high-quality enterprise solutions and exceeding project expectations.

Star Performer of the Year — Devgate Consultancy (2023)

Awarded for outstanding technical contributions, mentorship, and overall engineering impact.

Saudi Incubation Center Recognition (2023)

Contributed to a SaaS product selected for the Saudi Incubation Center, recognizing its innovation and commercial potential.

EDUCATION

Bachelor of Science in Software Engineering *Graduated 2022*

COMSATS Institute of Information Technology, Islamabad
